BUSINESS SERVICES

TODAY IS A GOOD REFLECTION OF OUR PAST SUCCESSES AND FAILURES "HOLDERNESS"

Transaction Advisory

We advise business transactions for individuals and corporates. Transactions range from business plans, financing decisions, project proposals, cash flow projections, business processes & systems, valuations, due diligence, networth certificates, corporate governance, customs clearing, taxation, estate planning, capital gains tax computations, VAT registrations, PAYE registrations, BPN registrations, Tax clearance certificates, corporate secretarial transactions and value chain propositions.

Retail Business Development

We are a unique retail clients focused business development unit. Our professional roots and training are retail based. We understand Fast Moving Consumer Goods markets (FMCG) from the core. We can offer value and support from start-up set up, operations set up, systems set up, tax compliance, financial reporting, payroll services, procurement solutions, stock takes and training.

Integrated and sustainability reporting models

We are excited with the current evolution in financial reporting from monotonous traditional annual reports to comprehensive integrated reports. We help SMEs to evolve towards more responsible corporate reporting by creation of integrated reporting models.

Corporate Secretarial Services

We have a network of consultants that have impressive turnaround times in transactions that range from company registrations (including offshore companies, currently South Africa), filling of annual returns, PRAZ registrations, NSSA registrations, ZIMDEF registrations, SDL registrations and NEC registrations.

Board services

In the modern corporate world, the board of directors is there to solve the agency problem. Shareholders normally move away and leave the business in the hands of management. The question is then, **who polices management on behalf of shareholders**. We come in to offer a board of directors that offer strategic advice and independent foresight for SME's that are shaping their growth towards large corporates. Our **mobile board** of directors will comprise of a public accountant, information technology expert, marketing expert and a lawyer at a minimum.

Asset management and administration services

We can manage and administer your personal and business assets through our various channels and consultants. Assets range from a single asset like a motor vehicle, building, breeding bull to a cash generating unit like a business. Owners of assets can either be in Zimbabwe or in the diaspora.

SBC Cargo Services

We assist our clients with services ranging from import export capacity set up. We also assist our clients with customs clearing services including asset temporary import applications with ZIMRA.

Career 911 Services

Through the Shaphat Trust we offer finance related career guidance. Most of the proceeds generated from this initiative will go towards our brand contribution to **Corporate Social Responsibility (CSR)**. The Shaphat Trust will be a non-profit organization interested in assisting kids born by blind parents who cannot take them to school and the deserted girl-child.
